

Creatoraine

Portrait Packages, Pricing, and Explanation of Creative Commission Process

Hello! Thank you for expressing interest in a custom Creatoraine portrait. My artistic creations are very personal, emotional and intuitive. I strive to reflect the beauty of colour and movement through these manifestations of body and soul united. I contemplate and meditate on the energies, stories, and emotions from the figures of each art piece, and derive to convey that visually and spiritually through its creation. These figures I create —with plants, moons, planets, or flowers for heads, or fairies— are deeply connected to my dreamscapes and visions of the body and soul connection; as if these creations are the visual representation of your current lifetime's bodily temple, and the infinite Universal essence of the soul. These portraits are also, intrinsically, an expression of body positive self love. I hope the artwork I create shows the true beauty in every body, and creates a safe space for people to appreciate the individual beauty, uniqueness and magic expressed in each creation.

I hope to convey this connection as honestly and authentically as possible, so knowing a little bit about you can go a long way! It is also just fun to learn about my clients generally, as I have made beautiful connections from selling my art in the past, and hope to continue to make connections in this artistic endeavour. It is completely voluntary, but once you have decided which portrait package suits your needs best, please send me an email and let's chat about nature, your favourite colours, dreams, the universe, or whatever interests you. From there, we can determine aspects you would like included in your custom portrait, and discuss our ideas together.
